Behind the Limits of Learning

Visit at The City Government Office

with Mayor Pavol Hric

C1 SHORT TERM STAFF MEETING

6th - 11th September

Despite that the organising of an international meeting seemed like mission impossible in Corona days, we finally managed! Our Primary school in Badín was a host for the 16 teachers from all 4 partner countries - Poland, Croatia, the North Macedonia and Turkey. We prepared a rich program full of educational workshop and seminars focused on professional development as well as study trips and shows of traditional regional culture. The program started with short presentations of the partners' schools and then we visited Pavol Hric, the mayor at the city office. The two men on the left wearing folk costumes played the traditional musical instruments fujara and heligónka. We also tasted some delicious cakes and pastry.

Creative atmosphere at Integral pedagogy seminar with Ms Turianska, the head teacher in Primary school Badín. The participants invented "teaching machine" involving all the necessary gear wheels a teacher needs to work efficiently.

Guests in the 8th grade class interviewed by the pupils about their countries, culture, and customs

Montessori workshop with Ms Tomaníková was very informative and a great fun

Blueprint craft workshop with Ms Dovalová, our chemistry teacher. The guests created their own unique handmade souvenirs

Educational activities focused on Learning styles in Learning garden, which has been build within "Zelená škola" project. The garden is intended to provide an informal and natural learning environment for children of all ages.

In the pictures you can see mathematical and musical activities prepared by Ms Hricová and Majlingová

UNESCO site: the articular wooden church in Hronsek was built in 17th century without a single nail.

...and the food! Delicious selection of sheep cheese, sausages and halušky - that is a must!

A few moments from other workshops on Learning styles, pedagogy and action research. We must say our partners are good workshop participants - active and productive.

Friday was a city day and the weather did a beautiful job. We started with a guided city tour and then attended a history lesson with pupils from 9th grade in the Museum of Slovak National Uprising. In the afternoon we all enjoyed "Radvanský jarmok", a street market with traditional and local crafts, food and folklore performances. We said good-bye at a nice typical end-of-summer Slovak dinner.
